Excerpt: . . . 11 proposed this project in specific response to mandates for renew-able energy. In conclusion, Cape Wind and the other wind projects that will follow present great potential for meeting the multiple objectives of national energy and environmental policy, including decreased reli-ance on imported fuel, reducing and offsetting air emissions, and lowering the cost of electricity to the ratepaying public, all with minimal environmental impact. Second, because the process involves so many agencies with often conflicting agendas, it is important that the process appropriately recognize the clearly stated Federal and State energy objectives, as well as the societal tradeoffs inherent to any major energy project.
