Springer-Verlag Gmbh Jul 2015, 2015. Taschenbuch. Book Condition: Neu. 236x159x12 mm. Neuware - Titan is practically a planet in its own right, with a diameter similar to that of Mercury, methane rainstorms, organic soot and ethane seas. All of the most detailed knowledge on the moon's geology, volcanology, meteorology, marine sciences and chemistry are gathered together here to paint a factually accurate hypothetical future of early human colonization on this strange world. The views from Titan's Mayda Outpost are spectacular, but all is not well at the moon's remote science base. On the shore of a methane sea beneath glowering skies, atmospheric researcher Abigail Marco finds herself in the middle of murder, piracy and colleagues who seem to be seeing sea monsters and dead people from the past. On the Shores of Titan's Farthest Sea provides thrills, excitement and mystery - couched in the latest science - on one of the Solar System's most bizarre worlds, Saturn's huge moon Titan. 'This riveting story, set against a plausibly well integrated interplanetary space, carries us along with its bright and interesting characters. We feel absolutely transported to a hauntingly beautiful and alien Titan through Carroll's masterful weaving of art and science.' - Jani Radebaugh, Professor of Planetary Sciences, Titan dune expert, BYU 'It's a fun read! Really makes Titan come alive, literally.' - Astrophysicist and author Ralph Lorenz 'Michael Carroll's new novel 'On the Shores of Titan's Farthest Sea' (Springer) is a gripping, good-vs-evil tale that sparkles with imagination. It's set on the shores of Kraken Mare, the vast methane sea found high in the northern latitudes of Saturn's moon, Titan, in a future when humanity has spread throughout the solar system. The villains are wicked, the heroes are scientists (Thanks, Mike!), the story is convincing, the dialogue snappy, and the scenery...
